May 29, 2013

The Honorable Jeff Merkley
United States Senate
313 Hart Senate Office Building
Washington, DC 20510

Dear Senator Merkley,

Individuals and companies in Coos County are eager to see investment in our region because of the hope it offers for economic growth, public funding, and jobs. We currently battle great deficits, high unemployment and the potential of additional business closures.

There are minimal opportunities for this level of capital investment and residual opportunity in the state of Oregon. The \$25M/ year Education Trust, \$32M in annual taxes and 750 jobs would satisfy many local needs that would otherwise experience shortfall or be recovered through additional taxes on struggling local companies and individuals.

Global energy usage relies heavily on coal. The environmental impact of coal can be reduced by replacing coal in part with liquefied natural gas from the US. There are growth opportunities in transportation as natural gas displaces coal and diesel. This further promotes environmental stewardship and domestic demand.

Domestic development of natural gas projects will aid in US energy independence, localized economic stimulus and an environmentally intelligent response to increasing energy needs. In addition, the Jordan Cove Energy Project would bring critical revenues to an area that has deep social need and desire to get back to work and heal from recent financial obstacles.

We ask for your support of the Jordan Cove Energy Project which is in the greatest public interest of the Coos County citizens and businesses.

Sincerely,

A handwritten signature in blue ink, appearing to read "Brianna Hanson", with a long horizontal flourish extending to the right.
