Dear Oregon Congressional Delegation,

I am writing to encourage you to support the Jordan Cove Energy Project. This project is going to provide an enormous boost to Southwest Oregon and will help a wide range of companies, especially construction companies like ours that rely on demand for new buildings.

Blazer Industries is a wholesale modular building manufacturer specializing in Custom commercial, residential and specialty buildings. Our main construction facility and offices are located in Aumsville, Oregon in the heart of the Willamette Valley. Since 1976, Blazer has grown steadily to become a trusted leader and innovator in the modular building industry. We are proud of the buildings we create, and in the progress we have made as a manufacturer.

The Jordan Cove Energy Project will create an average of 1,750 construction jobs over 42 months, with peak manpower being 3,400 construction jobs. Jordan Cove is working right now to identify how it will house these workers and their families

Instant Buildings

without disrupting tourism. Jordan Cove is working with the Cities of Coos Bay and North Bend, the Bay Area Chamber of Commerce, the local Lodging Association and others, including a housing development group that plans to create a large housing complex for use by construction workers that would be converted to affordable housing units once the Jordan Cove workforce had passed its peak. If Jordan Cove moves forward on this plan, we anticipate being a partner in this project.

After the construction of the Jordan Cove Energy Project is complete, and the infrastructure improvements that Jordan Cove has planned are in place, we believe that Southwest Oregon will get a hard look from out of state companies interested in relocating to our area. Not only will this beg the need for new housing, companies that relocate to our area will likely construct new buildings. This creates yet additional opportunities for our company.

The strength of a Blazer building is a direct reflection of our amazing workforce. Any additional work that comes our way increases the chances that we can add to our workforce. Jordan Cove could create just those types of opportunities. I hope you will support this important project.

Sincerely,

Marv Shetler

Marv Shetler
President
