Dear Oregon Congressional Delegation,

I am writing on behalf of Consolidated Electronic Distributors (CED) to ask you to support the Jordan Cove Energy Project. I hope you will do everything you can to ensure the project gets the Department of Energy approval it needs to export LNG out of Coos Bay.

Located in North Bend, CED is a full-service electrical distributor dedicated to supporting the electrical requirements of industrial, contractor, and OEM customers. The opportunities are clear cut for a business like CED. The success of CED is tied directly to the overall well-being of the local economy – more economic activity in the region means more customers for me. The new businesses the Jordan Cove Energy Project will attract – through enhancement of the Port of Coos Bay and Southwest Oregon's infrastructure – will require various services that my company provides.

As a Coos County resident, I strongly support the Jordan Cove Energy Project because it will generate tens of millions of dollars in tax revenue (or payments in lieu of taxes) for Coos County that will be used to improve local services and boost area schools, all while creating hundreds of new – and permanent – family-wage jobs in Southwest Oregon. This will only increase the overall level of stimulus generated by this project.

I appreciate anything you can do to ensure this project to moves forward. Thank you for your time and consideration.

Sincerely,

Jason Te  
Manager CED-North Bend
