Dear Oregon Congressional Delegation,

I am writing to ask you to support the Jordan Cove Energy Project. I hope you will do everything you can to ensure the project gets the Department of Energy approval it needs to export LNG out of Coos Bay.

Lloyd Electric LLC is a locally owned, family-run business. We are very involved in our community; we provide quality electrical services for residential, commercial and industrial customers throughout the coastal area including Coos, Curry and Douglas counties. As a Coos Bay area resident, I support responsible development that creates jobs in the area, and in turn, brings success to the local businesses in Southwest Oregon.

The opportunities are clear cut for me as a business owner. The success of Lloyd Electric is tied directly to the overall well-being of the local economy – more disposable income in the region means more customers for me. The Jordan Cove Energy Project is going to significantly increase the amount of disposable income in Southwest Oregon by providing jobs for more than two thousand construction workers, and then the operation of the facility is going to support upwards of 750 new, permanent jobs in the area. This project will also attract new businesses to the area that will require various services that my company provides.

I appreciate anything you can do to ensure this project to moves forward. Thank you for your time and consideration.

Sincerely,

Lloyd E. Pedro
Owner, Lloyd Electric
